## SEWRPC STAFF MEMORANDUM

### RESPONSE TO REQUEST BY THE VILLAGE OF PEWAUKEE TO AMEND THE PEWAUKEE SANITARY SEWER SERVICE AREA

#### INTRODUCTION AND BACKGROUND

By letter dated January 22, 2004, the Village of Pewaukee requested that the Southeastern Wisconsin Regional Planning Commission amend the Pewaukee sanitary sewer service area as that area is currently documented in SEWRPC Community Assistance Planning Report No. 113, *Sanitary Sewer Service Area for the Town of Pewaukee Sanitary District No. 3, Lake Pewaukee Sanitary District, and Village of Pewaukee, Waukesha County, Wisconsin*, dated June 1985, as amended. The basic purpose of the amendment would be to include within the planned Pewaukee sewer service area certain lands located immediately adjacent to, but outside, the currently adopted sewer service area.

The land in question is currently part of the City of Pewaukee. In its January 22nd letter to the Commission, the Village indicated that the City and Village of Pewaukee are working together to attach the land to the Village. By letter to the Commission dated February 4, 2004, the City of Pewaukee indicated its support for the sewer service area amendment requested by the Village.

#### AREA DESCRIPTION

The area proposed to be added to the Pewaukee sanitary sewer service area encompasses about 9 acres located north of Lindsay Road near its intersection with Sussex Road (see Map 1). The subject area includes about two acres which have been developed as a single-family homesite, just over one acre that is part of an isolated natural resource area, and just over 5 acres of agricultural and other open land. The subject area comprises the southerly portion of an area proposed to be developed as a single-family residential subdivision. The subject area itself would accommodate about four housing units in the proposed subdivision.

#### RELATIONSHIP OF THE PROPOSED CHANGE TO THE EXISTING SANITARY SEWER SERVICE AREA

The proposed addition of 9 acres to the Pewaukee sewer service area represents an increase in the planned sewer service area of less than 1 percent. The population of the sewer service area would not change significantly with the proposed addition.

The subject area is part of a larger area which had been proposed to be added to the Pewaukee sewer service area in 1991. At the request of what was then the Town of Pewaukee at a public hearing on the proposed amendment, the subject area was not included in the addition to the sewer service area at that time (See "Amendment to the Regional Water Quality Management Plan-2000, Village of Pewaukee," dated March 1991).

#### ENVIRONMENTALLY SIGNIFICANT LANDS

As noted above, the subject area includes a portion of an isolated natural resource area, part of which is comprised of steep slopes. Under Wisconsin Department of Natural Resources regulations governing sanitary sewer extensions, sanitary sewers may not be extended to serve development in any portion of the isolated natural resource area which is comprised of steep slopes.

The boundaries of the environmentally significant lands shown on Map 1 have been updated to reflect existing (2000) conditions and current floodplain delineations.

## **WATER QUALITY IMPACTS**

Under the adopted regional water quality management plan and the refined sanitary sewer service area plan presented herein, it is envisioned that all urban lands within the planned urban service area would receive sanitary sewer service. Assuming that all applicable Federal, State, and local permits are obtained and that proper site development and construction practices are employed, there should be no significant adverse water quality impacts attributable to the development of the planned sanitary sewer service area.

## **COST-EFFECTIVENESS ANALYSIS**

The subject area is almost entirely surrounded by lands located within the currently approved Pewaukee sanitary sewer service area tributary to the Fox River Water Pollution Control Center sewage treatment facility. No additional analysis is necessary to conclude that the subject area would be most cost-effectively served through connection to the Pewaukee sewerage system.

## **SEWAGE TREATMENT PLANT CAPACITY IMPACT ANALYSIS**

The estimated incremental development on the subject site—four residential homesites—would have a negligible impact on the overall loadings to the Fox River Water Pollution Control Center sewage treatment facility.

## **PUBLIC REACTION TO THE PLAN AMENDMENT**

A public hearing was held on February 11, 2004, at the Pewaukee Village Hall to receive public comment on, and reaction to, the proposed plan amendment. The hearing was sponsored by the Village of Pewaukee and the Regional Planning Commission. A summary of the plan amendment was presented prior to receiving public comment, including a description of the lands proposed to be added to the sewer service area and any environmentally significant lands located within.

A review of the hearing record indicates that no objections were expressed regarding the proposed amendment. Accordingly, no changes were made to the proposed plan amendment as presented at the public hearing.

## **PEWAUKEE VILLAGE BOARD ACTION ON THE PROPOSED PLAN AMENDMENT**

The Pewaukee Village Board of Trustees adopted the proposed sewer service area plan amendment on March 2, 2004.

## **CONCLUDING RECOMMENDATION**

Based on the foregoing, it is recommended that the Southeastern Wisconsin Regional Planning Commission formally amend the Pewaukee sanitary sewer service area as documented in SEWRPC Community Assistance Planning Report No. 113, in the manner shown on Map 1.
